Fog Sealing Streets

Street fog sealing will be around the middle of September, barring unforeseen weather or mechanical difficulties. These are **ONLY** for the streets that were chip sealed last month.

Please move your vehicles away from the street, and do **NOT** water your yard that morning so that crews can fog seal the streets effectively. Any vehicles **NOT** moved from the street will be towed. **Streets being fog sealed will be blocked to all through traffic for approximately two hours, depending on weather conditions.**

Utility Line Tree Trimming

Notice from the Electric Department - Starting the end of September, the Electric Department will begin the annual trimming of the tree branches away from the primary and secondary electric power lines. OSHA rules and regulations addresses safety considerations related to line clearances as the trimming of any tree or brush that is within 10 feet of an electric power line. It is more effective to trim trees during the day than at night during a storm.

**** NOTICE ****

The City of Goodland is in the process of changing out older electric and water meters. We have several crews of men working throughout town. The men have City of Goodland identification and driving small pickup trucks identified as City vehicles. They are knocking on doors, and when the residents are home, letting them know what we need to do and changing out the meters.

When a resident is not home, if we have access to the meter, we will go ahead and change out the meter.

If we do not have access to the meter, we will contact the resident to set up an appointment.

We apologize for any inconvenience this may cause.
