# 17

St. Patrick's Day

# March

## A Bit of History

Saint Patrick was born in the fifth century as a citizen of Roman Britain. At the age of 16, he was enslaved and taken to Ireland, where he spent six years in captivity. He then escaped, only to later return to bring Christianity to the people of Ireland. During his life, he became a priest and founded schools, churches, and monasteries throughout the Emerald Isle before his death on March 17, 461 A.D. Over 40 years he worked to converting the Celtic to Christian. A famous legend about St. Patrick is that he used the three leaves of the clover to explain the Holy Trinity. These are the Father, the Son, and the Holy Spirit. Another legend is that St. Patrick rid Ireland of all snakes. The snakes were to represent paganism and St. Patrick driving it off. It was homesick Irish soldiers & immigrants in the United States who were largely responsible for slowly shifting St. Patrick's Day from a religious observation to a secular one. Boston, with its massive Irish population, held the first parade in 1737, with New York City following suit 25 years later. Today, along with Chicago, which is famed for dyeing its river green since 1962, these cities still offer some of the biggest celebrations dedicated to St. Patrick and Irish Heritage.

**To help prevent fires and extra costs please use proper disposal methods at the Landfill and remember to remove rims from tires before disposing. Pricing listed below may be subject to change.**
